Subject: Amended Post-Closure Plan Approval

Dear Mr. Thompson:

On September 28, 2021, Ohio EPA received a request from CECOS International for the facility located at 5092 Aber Road, Williamsburg, Ohio. After discussion with Ohio EPA, the request was updated and resubmitted on December 7, 2021. The request seeks to amend the Post-Closure Plan approved on February 14, 1997, and last amended March 2019 and details the following changes:

- Tables 10, 11, 14 & 15 have been revised to reflect that ground water samples for dissolved chromium will be analyzed by SW-846 Method 6010C and that samples for dissolved barium, cadmium, lead, selenium, and silver will be analyzed by SW-846 Method 6020A.
- Tables 11 and 14 also have been revised to reflect a revised practical quantitation limit of 0.001 mg/L for dissolved barium.

In accordance with the table listed in the Appendix to Ohio Administrative Code (OAC) Rule 3745-50-51, my staff have recommended to the Director of Ohio EPA the request be approved as equivalent to a Class 1* permit modification (requiring review and approval). While the facility was closed under the applicable interim status rules located in OAC Chapter 66, ground water monitoring under this amended Post-Closure Plan complies with the final permitted facility standards in accordance with OAC Chapters 54 and 55. Therefore, with this letter, Ohio EPA approves CECOS's above request to amend the Post-Closure Plan submitted pursuant to OAC Rule 3745-66-18, and accordingly Ohio EPA has amended the facility's Post-Closure Plan. You are hereby directed to implement the amended Post-Closure Plan. The updated Post-Closure Plan can be retrieved from the Agency's eDocument Search web site: <http://edocpub.epa.ohio.gov/publicportal/edochome.aspx>. Using the search function, search under the document type of "Plan" and then refine the search using the facility's RCRA ID number (Secondary ID) which is noted in the RE: block above.

Mr. Andrew Thompson
